

VANSH JAISWAL

Node.js Backend Developer | NestJS · Microservices · REST APIs

jaiswalvansh96@gmail.com | +91 7249782852 | Bangalore, Karnataka | linkedin.com/in/vansh-jaiswal | github.com/Vanshgg33 | vansh-s-backend-hub.vercel.app

PROFESSIONAL SUMMARY

Results-driven Node.js Backend Developer with 1+ year of production experience shipping microservices, REST APIs, and AI-integrated SaaS features across 5+ client products. Collaborative team player who reduced proposal creation time by ~60% via Gemini AI integration and brought unauthorized access incidents to zero. Adept at problem-solving under pressure and communicating technical decisions clearly across cross-functional teams.

TECHNICAL SKILLS

Languages: JavaScript (ES2022+), TypeScript, Java **Backend:** Node.js, NestJS, REST APIs, Microservices, WebSockets, FastAPI

Frontend: Next.js, Angular, React, HTML5, CSS3, Tailwind CSS **Databases:** MongoDB, MySQL, SQL

Auth & APIs: JWT, OAuth 2.0, Google APIs, Meta Graph API, Gemini AI **Tools:** Docker, Git, Playwright, crawl4ai, Power BI

Soft Skills: Cross-functional collaboration, Technical communication, Problem-solving, Ownership, Adaptability

EXPERIENCE

Backend Developer (Node.js) | Arobuz Growth Agency Oct 2025 – Present

- Architected an end-to-end CRM backend in NestJS covering lead management, pipeline tracking, and user roles; integrated Gemini AI for automated proposal generation, reducing creation time by ~60% and saving the ops team ~3 hrs/day.
- Engineered a multi-platform scraping engine (Twitter/X, LinkedIn, Instagram) using Playwright + crawl4ai, normalizing profiles, posts, and engagement signals into a unified MongoDB schema — 500+ records per crawl, under 2% data loss.
- Delivered a unified Ads Management Portal for Meta, Google, LinkedIn, and Pinterest — deployed to production and used daily across 3 client accounts.
- Launched an in-app ad-creative image editor and an in-house Google Meet-style video platform with WebSocket sessions, cutting third-party tool costs entirely.
- Spearheaded development of an in-house project management tool with task tracking, team assignment, and deadline management, replacing paid external PM subscriptions.

Full Stack Developer Intern | Resonit Feb 2025 – Jul 2025 · 6 months

- Built a full-stack e-commerce platform with Spring Boot + React, implementing product catalog, cart, and order management backed by MySQL.
- Integrated Razorpay payment gateway — handling checkout initiation, webhook-based order confirmation, and payment failure/retry flows to ensure reliable transaction state management.
- Designed RESTful APIs with Spring Data JPA and secured endpoints using JWT-based auth + RBAC via Spring Security across customer and admin roles.

PROJECTS

WhatsApp Commerce Backend System

NestJS · MongoDB · Meta Business API · Webhooks

- Automated the full order management lifecycle via a WhatsApp bot handling catalog browsing, order placement, and status updates with event-driven APIs (creation → billing → dispatch), RBAC, and 200+ order events/day; integrated Power BI dashboards for real-time sales and dispatch SLA reporting.

Crawler — Social Media Scraper

Python · FastAPI · Playwright · crawl4ai · Next.js

- Engineered a multi-platform GraphQL-intercepting crawler (Twitter/X, LinkedIn, Instagram) via FastAPI, with a companion Next.js dashboard — under 3s per profile, ~50% reduction in manual data review time.

Restaurant Management & Ordering System

Node.js · MySQL · REST APIs

- Developed backend APIs for order processing and menu management with a KOT workflow, streamlining kitchen-to-front-of-house communication for a 30-table restaurant.

Card Management System

Spring Boot · Java · MySQL · REST APIs

- Implemented a secure card management backend enforcing role-based data access and transaction integrity across 3 user permission levels.
