PROFESSIONAL SUMMARY

Results-driven Backend Engineer with 1+ years of production experience designing scalable microservices, RESTful APIs, and AI-integrated SaaS platforms across 5+ client products. Proficient in Node.js, NestJS, Spring Boot, Java, TypeScript, and Python, with deep expertise in MongoDB, MySQL, Docker, JWT, OAuth 2.0, and WebSockets. Reduced operational turnaround by 60% through Gemini AI automation and eliminated unauthorized access incidents via hardened authentication.

TECHNICAL SKILLS

Languages: JavaScript (ES2022+), TypeScript, Java, Python, SQL

Backend: Node.js, NestJS, Spring Boot, Spring Data JPA, Spring Security, Express.js, FastAPI, REST APIs, Microservices, WebSockets, Event-Driven Architecture

Databases: MongoDB, MySQL, SQL, NoSQL, Schema Design, Query Optimization

Auth & Security: JWT, OAuth 2.0, RBAC (Role-Based Access Control), Spring Security, Webhook Verification

DevOps & Tools: Docker, Git, GitHub, CI/CD, Vercel, Postman, Linux

Integrations: Google APIs, Meta Graph API, Razorpay, Gemini AI, Power BI, Playwright, crawl4ai

Frontend: React, Next.js, Angular, Tailwind CSS, HTML5, CSS3

Soft Skills: Cross-functional Collaboration, Technical Communication, Problem-Solving, Ownership, Adaptability

PROFESSIONAL EXPERIENCE

Backend Engineer (Node.js, NestJS) - Arobuz Growth Agency

Oct 2025 - Present

- Architected an end-to-end CRM backend in NestJS using a microservices architecture for lead management, sales pipelines, and role-based access via JWT and OAuth 2.0; integrated Gemini AI to automate proposal generation, reducing turnaround by 60% and saving the operations team approximately 3 hours per day.
- Engineered a production-grade multi-platform scraping engine (Twitter/X, LinkedIn, Instagram) with Playwright, Python, and crawl4ai, normalizing data into a unified MongoDB schema; sustained 500+ records per crawl with under 2% data loss.
- Delivered a unified Ads Management Portal integrating Meta Graph API, Google APIs, LinkedIn, and Pinterest into a single Node.js REST API service; deployed to production and used daily across 3 client accounts.
- Launched an in-app ad-creative editor and a Google Meet-style video collaboration platform powered by WebSockets, eliminating recurring third-party SaaS costs and reducing unauthorized access incidents to zero through hardened JWT and OAuth flows.
- Spearheaded development of an in-house project management tool with task tracking, team assignment, and deadline workflows, replacing paid external subscriptions and streamlining cross-team delivery.

Full Stack Developer Intern (Spring Boot, Java) - Resonit

Feb 2025 - Jul 2025

- Developed a production-grade e-commerce platform using Spring Boot, Java, and React on MySQL, implementing product catalog, cart, and order modules backed by RESTful APIs and Spring Data JPA.
- Integrated the Razorpay payment gateway end-to-end, covering checkout initiation, webhook-based order confirmation, and failure/retry handling for reliable transaction state.
- Implemented REST APIs secured with JWT authentication and RBAC via Spring Security across customer and admin roles, with optimized MySQL queries and indexes for low-latency response times.

PROJECTS

WhatsApp Commerce Backend System - NestJS, MongoDB, Meta Business API, REST APIs, Webhooks, Power BI

- Automated the full order management lifecycle (creation, billing, dispatch) via a WhatsApp bot using event-driven NestJS APIs; sustains 200+ order events per day under RBAC-secured REST endpoints, with Power BI dashboards for real-time sales and SLA reporting.

Multi-Platform Social Media Crawler - Python, FastAPI, Playwright, crawl4ai, Next.js

- Engineered a GraphQL-intercepting crawler for Twitter/X, LinkedIn, and Instagram on a FastAPI backend with a Next.js operator dashboard, achieving sub-3-second profile extraction and an approximate 50% reduction in manual data review.

Secure Card Operations Backend - Spring Boot, Java, MySQL, REST APIs, Spring Security, JWT

- Implemented a card operations service in Spring Boot enforcing role-based access and transactional integrity across 3 permission levels, with REST APIs secured by Spring Security and JWT, persisted via Spring Data JPA on MySQL.

EDUCATION

Bachelor of Computer Applications (BCA) - Manipal University Jaipur

Expected 2026
